

Northwestern Facial Plastic and Reconstructive Surgery

Dr. Douglas Sidle, director of the division of facial plastic and reconstructive surgery, is one of the few doctors at Northwestern Memorial Hospital dedicated exclusively to facial aesthetics.

Specializing in cosmetic and restorative surgery, Dr. Sidle is an expert in minimally invasive procedures that can rejuvenate your appearance with reduced recovery time. His advanced techniques in rhinoplasty will improve the aesthetic appearance of your nose and relieve symptoms of nasal obstruction. He also offers:

- Botox®, Restylane®, Perlane®, Sculptra™, and fat injections
- Face lift, neck lift, and chin tuck
- Blepharoplasty (eyelid surgery)
- Hair restoration/transplantation
- Scar revision
- Lip and smile enhancement

Dr. Sidle is a board-certified, fellowship-trained facial plastic surgeon. He is actively involved with both the American Academy of Facial Plastic and Reconstructive Surgery and the International Society of Hair Restoration Surgeons. As an integral faculty member of the Northwestern University Feinberg School of Medicine, he is committed to teaching both patients and students.

Visit Dr. Sidle at the Northwestern Medical Faculty Foundation, department of otolaryngology and uncover a more youthful you.
